Hair products make a HUGE difference!

We recommend to use *only* the products that we have *tested and approved* to ensure that you do not cause unintentional harm to your hair.

Our regimen will ensure your hair is receiving the vital nutrients that it needs to stay healthy and manageable, giving your hair the **longest wear time possible!**

Davines uses high quality ingredients that will boost the health of your hair every time you use them!

Avoid all products with these ingredients!

- Sulphate Free
- Paraben Free
- Chemical Free

A modern building with large glass windows and a central pond with lily pads. The text 'WHY Davines' is overlaid in white.

WHY Davines

Davines has outshined all others product lines over a 20 year time span of testing various professional hair care lines.

Our clients have noticed the profound impact this hair care has made on their natural hair, and plays an important role in the health and rehabilitation of your natural hair while wearing extensions!

Things we really *love about Davines*

98% all Natural Ingredients.

Ingredients come from local farms.

They use medicinal and healing plantlife at risk of going extinct.

Made in Italy, family owned.

All containers are biodegradable.

They pride themselves on being the BEST for the planet.

Certified B corp!

Concentrated, so a little goes a long way.

Effective! Formulated with a micro molecule so they can actually be absorbed into the hair!

OI ALL IN ONE MILK AND OI OIL

MELU HEAT SHIELD

MASK TREATMENT

WASHING DAVINES SHAMPOO

When using Davines, each time you are washing/conditioning you are giving your hair multi vitamins and nutrients instead of stripping your hair by using chemical ingredients.

How to...

1. Wash as needed, focusing on the oily areas of the scalp and between your wefts.
2. Allow the suds to cleanse through your extensions.
3. Repeat a second wash if you only wash 1x a week or use a lot of products.

*WASHING CLARIFYING SHAMPOO

We recommend to use SOLU clarifying shampoo at least ONCE a month to remove minerals, build up and brighten blondes.

02 CONDITIONING

How to...

1. Before applying conditioner, ring out the excess water for a more effective application.
2. Apply conditioner to the **roots** of your extensions and spread it throughout the mid shaft and ends.
3. Use your fingers to work it throughout the hair and remove any tangles.
4. Condition hair between the wefts to ensure no hair is neglected.
5. Let conditioner absorb into the hair for 5 min.
6. Rinse well to remove all conditioner from the hair.

MOISTURE DETANGLER OI ALL IN ONE MILK

Oi All in One Milk is called “All in one” because of its many benefits to your hair!

How to...

1. Use on clean, towel dried hair.
2. Spray at the base of each weft and distribute evenly throughout midshaft and ends.
3. Comb through the hair using a Wet Brush and make sure to detangle the hairs between the wefts too!
4. A little goes a long way, be sure not to apply too much!

TIP: Can be used directly on scalp to sooth and relieve itching

EXTRA BENEFITS

- It reduces your blow drying time
- Prevents dehydration when blowdrying
- Helps detangle damp hair
- Provides an anti aging UV shield
- Hydrates and reduces frizz
- Has Roucou oil for treatment

THIS IS A STEP YOU NEVER WANT TO SKIP!
This is the ONLY Oil we recommend!

TREATMENT OI OIL

NOT ALL OILS ARE CREATED EQUALLY!

Oi Oil is specifically formulated with a small enough molecule so that it can penetrate the hair shaft and absorb into the hair.

It won't leave your hair feeling oily or weighed down. Oi oil will heal your hair with its active ingredients. Roucou is one of the world's most powerful healing oils and Ylang ylang stimulates a positive mood.

Oi oil benefits

- Strengthens hair elasticity
- Prevents dehydration and breakage
- Decreases frizz
- Adds shine and keeps your hair tangle free.

THIS IS A STEP YOU NEVER WANT TO SKIP!
This is the ONLY Oil we recommend!

TREATMENT OIL

How to...

1. After washing, apply at least 15 pumps on (fine hair) or 20-25 pumps or more (thick hair) to damp, towel dried hair. Separate each row and disperse pumps of oil in sections.
2. Apply oil on your entire extensions, roots to ends, targeting every strand. Can be used daily or when needed to hydrate, soften, and keep your hair tangle free.
3. After Blow drying and styling the hair, you can reapply additional pumps to replace lost moisture from heat styling.
4. Use daily to keep hair hydrated, or before bed for softer strands.

*BLOW DRYING

Straight hair extensions require heat manipulation.

Air dried straight hair may look dull, lackluster, and get tangled due to the cuticle being in tact.

If you have straight hair extensions installed we recommend to always blow dry your extensions for their best look and feel!

Blowdrying polishes the hair strands and reduces tangles, giving your hair a silkier appearance with more shine, it creates cohesiveness between the texture of your hair and the extensions.

TIP You can allow your hair to air dry up to 80% to save time and effort in your blow drying process!

For best results...

Use a round brush and create a bouncy bend on the ends. Dry until roots to end are free of moisture.

Along with the Milk and Oil, using *Davines Blow Dry Primer*, or *Color Wow Dream coat* to lock in your blow out, and keep outside moisture and humidity from spoiling your blow out!

Make sure to blow dry your hair to complete dryness to ensure the best results. Leaving moisture in the hair may contribute to frizz as the cuticle may still be frayed outward. It may take about an hour for the ions to settle and the cuticle to relax.

*EMBRACE THE WAVE

If you are wearing curly or wavy hair extensions you may want to embrace the wave!

Curly hair is generally more course.

We recommend to use DAVINES LOVE CURL LINE on your hair for additional moisture and nicer air dried curls.

For best results...

AFTER WASHING

Make sure that you use a Wet Brush to thoroughly detangle your hair while it is damp. Make sure you are separating each weft and applying your Davines Oi Milk and Oi Oil at the root to the ends of your extensions. Make sure to use the products on the hairs in between the wefts and feel with your fingers to ensure you are not accumulating tangles in between your wefts.

We recommend to use Davines Oi oil daily to give additional hydration to coarse hair. Ask your stylist about our many Curly hair products!

AIR DRY OR DIFFUSE YOUR HAIR!

HEAT PROTECTANT MELU HAIR SHIELD

Melu Hair Shield is designed to protect your hair from heat damage, split ends, and color loss!

MELU Hair Shield helps to provide a barrier between your hair and hot tools for a healthier styling experience.

How to...

- Spray a light mist all over hair, allow it to dry.
- Once applied, the Heat Shield will stay on the hair until washed off. It is not necessary to reapply each time you use your hot tool.
- Can be used on clean, damp or dry hair.

*HEAT STYLING

Our hair is 100% human hair and can be heat styled to be worn sleek straight, wavy or curly.

Heat styling is a great way to ensure your hair extensions are looking and feeling their best. By applying heat, you are manipulating the hair strands to blend in with your own hair.

Heat gives the hair a shinier appearance and will leave your hair with less tangles since it forces the cuticle to relax.

We recommend...

- Using a high quality CERAMIC hot tool and to always protect your hair by using Melu heat shield before styling with your hot tools.
- Use smaller sections to ensure heat is even.
- Use your hot tool within 5 minutes of turning it on to prevent your tool from overheating!
- Always ensure your hair is fully dried before using your hot tools.

We do not recommend to use your highest heat temperature settings on the hair. Try lowering your heat settings to use at 300-350 degrees.

HEAT STYLING IS ENCOURAGED WHEN USING SAFE HEAT PRACTICES!

Please be aware OF OLD AND FAULTY HOT TOOLS

Often times old and faulty hot tools malfunction and result in the temperature gauge exceeding safe temperature settings.

If your hair smells burned after heat styling, or if you noticed an increase in dryness, tangles, split ends and breakage, you may need to replace your hot tool, or lower your heat setting.

Be advised, heat damage is not reversible!

Disclaimer

The T3 iron is known to exceed safe temperature settings and can cause rapid heat damage to Hair Extensions. Use on low settings only or discontinue use if any of the heat damage symptoms apply to you.

REPAIR HAIR MASK

Hair masks are vital in maintaining the health and life of your extensions.

They provide deeper conditioning and reconstructing benefits to revitalize colour treated, dry or damaged hair.

Using masks can maintain and restore the health of your hair and prevent damage!

How to...

- After washing, squeeze excess water from hair and supply a generous amount from root to ends.
- Comb through and leave mask to sit for 5- 15 minutes.
- Rinse thoroughly.
- Repeats 2x a month.

Your stylist will help you select a Davines mask that is best suited for your hair type and needs.

*SLEEPING

Before bed, we recommend to brush your hair to ensure it is tangle free. In dryer climates or seasons, you might apply some Oil oil to your hair before putting your hair in a loose braid or bun.

Tying your hair up before sleeping will prevent your locks from tangling and matting if you toss and turn in your sleep!

AVOID going to bed with wet hair!
If you absolutely **MUST**, prep your hair, and tie it in a braid before sleeping.

For best results...

Silk pillowcases and scrunchies are encouraged and gentle on your strands!

You will wake up with more manageable hair and less styling obligations!

All products sold at Hair Boss are tested to be safe and effective on your natural hair and extensions.

We recommend to use Davines styling products to ensure your not causing unintentional damage to your hair.

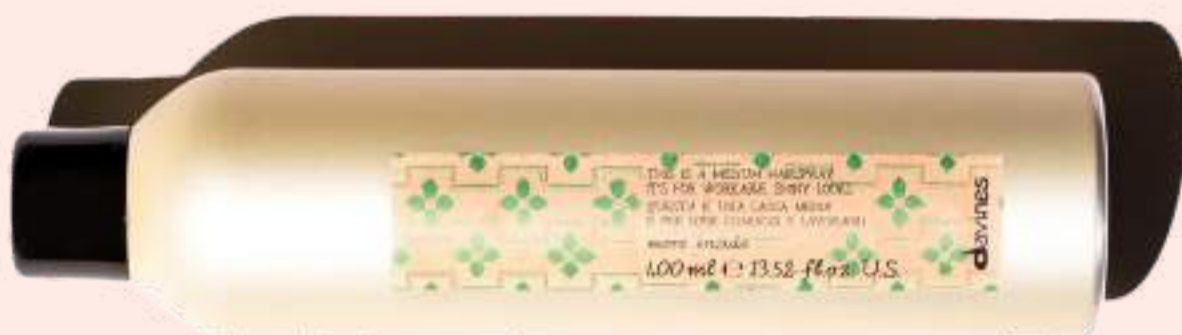

*STYLING PRODUCTS

Davines has high performing styling products like invisible Dry Shampoo, Mouse, Curl creams, pomades, Texture spray, Volumizers and more!

*Free to style your hair,
rest assured your strands are safe!*

A hairspray that smells like Vanilla Cupcakes?!

If you desire to use hairspray, we highly recommend to use one of our many Davines Hairspray collections. The Davines Hairspray is delicate and gentle on your strands. It provides a great hold while leaving the hair soft and shiny.

Most hairsprays have a high alcohol content in them which can dry out and cause severe breakage to your extensions.

Avoid chemical based products sitting on your hair for long periods of time.

MISTAKES TO AVOID

- ✘ Avoid Sunscreen that contains Avobenzone and Octocrylene.
- ✘ Avoid bath salts, bath oils and bath balms.
- ✘ Avoid any bleach or peroxide touching the hand tied wefts.
- ✘ Avoid parabens and sulphates.
- ✘ Avoid artificial chemical based products.

MAINTENANCE

Tune up

Tune-Up services are highly recommended every 4 weeks to upkeep your Skinny Weft extensions and ensure that you can get 6 months wear out of an installation.

The Tune up service is important for removing the naturally occurring shedding that is released from your hair on a daily basis.

When you miss your 4 week Tune up, you risk the potential of too much hair getting trapped between your wefts and your scalp. This could cause matting and tangles which can prevent us from successfully completing a Tune up service.

Waiting longer than 4 weeks for your Tune up will result in higher costs, as it becomes more time and more labor for our stylists to complete the service. Waiting too long between Tune Up visits may mean having to do a removal and re-installation .

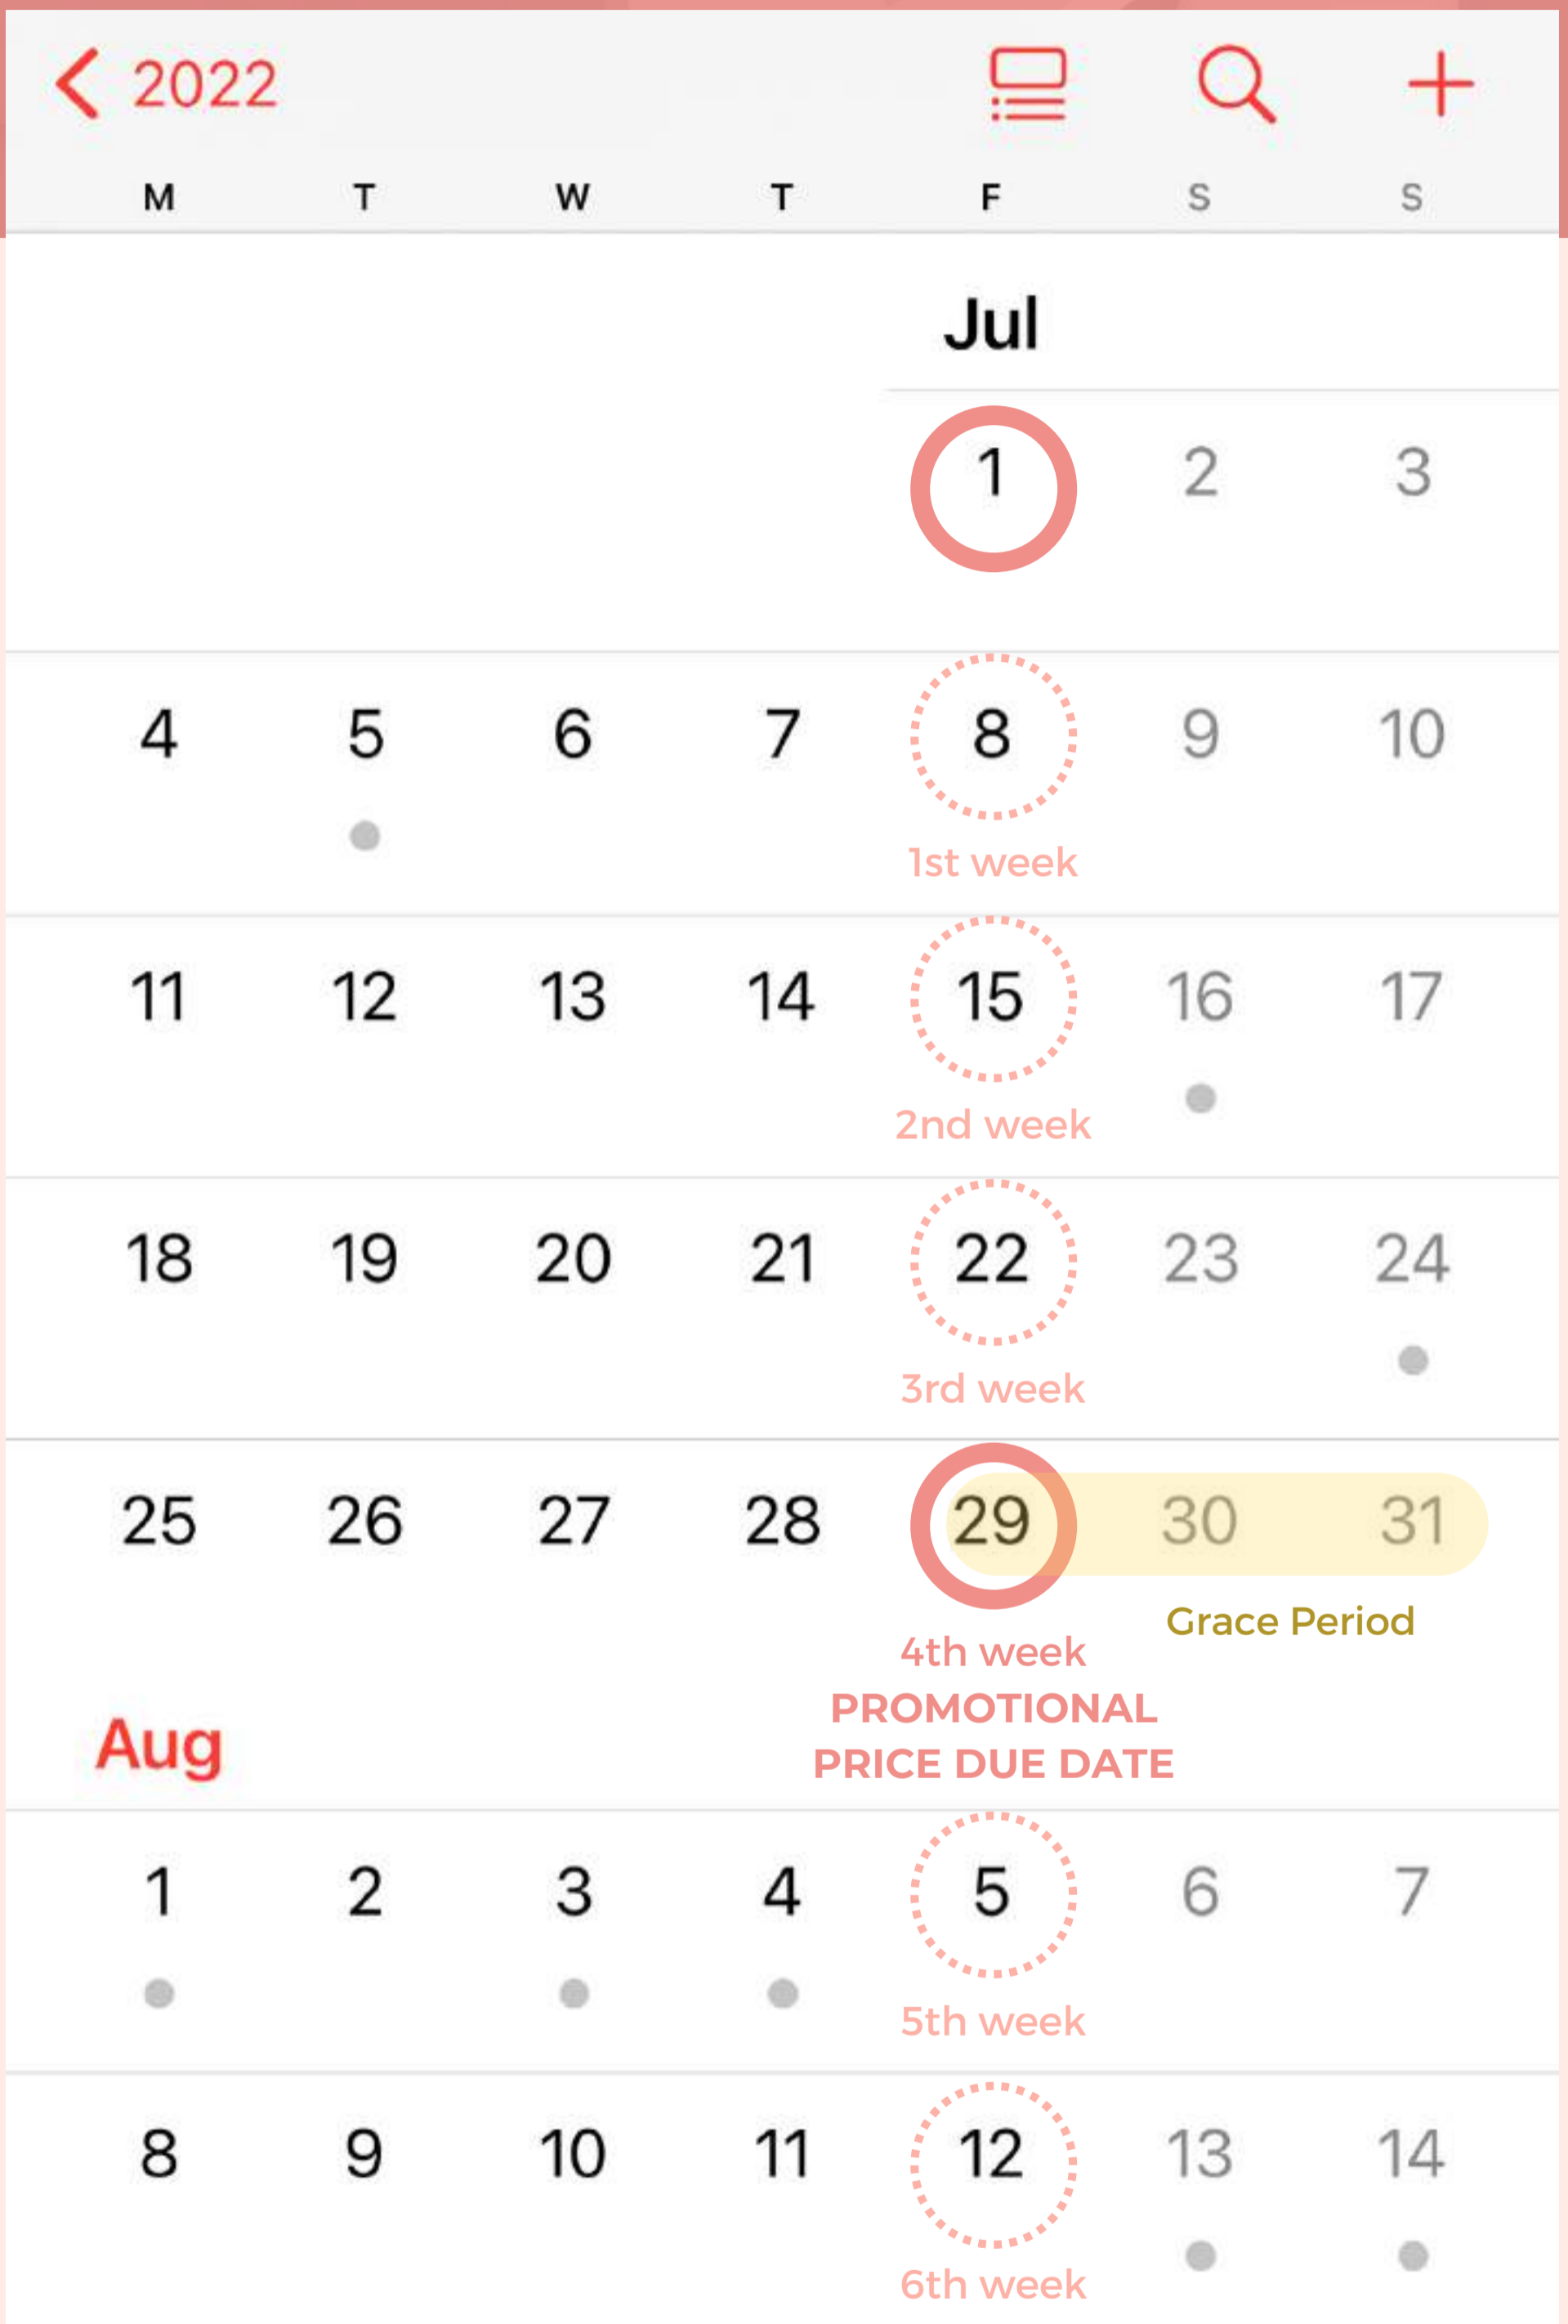

TAKE ADVANTAGE OF THE *Promotional Price*

	PROMOTIONAL PRICE	Regular Price			
	4 week	5 week	6 week	7 week	8 week
1 row	\$65	\$85	\$115	\$130	\$150
2 rows	\$80	\$100	\$120	\$160	\$180
3 rows	\$100	\$120	\$150	\$200	\$220
4 rows	\$125	\$145	\$187.50	\$250	\$270
5 rows	\$150	\$170	\$225	\$300	\$320

7 week and 8 weeks Tune ups will be subject to evaluation, there is **no guaranteed** that we can do a Tune Up and may need a Reinstallation.

CALENDAR MONTH VIEW

To consider you eligible for the Promotional Tune Up cost you must be under the "Grace period" which includes the due date + 2 more days. Otherwise the specified 5, 6, 7 or 8 week Tune Up price - is the regular cost.

Frequently Asked questions

FAQ

Are you penalizing me for scheduling my Tune Up past 4 weeks?

We are not penalizing you or charging you a fee. We're giving you an opportunity to book in advance and get a promotional rate for booking within our recommended timeframe. This is our incentive for you to stick to good hair habits. If you do not come within that timeframe, you will be paying the regular rate and the cost increases each week.

Why does the cost go up each week, if it's still the same Tune Up maintenance service?

Your 4 week maintenance due date is based on your hair's natural shedding cycles. Shedding doesn't stop. Each additional week could be 1,000 or more hair's that shed. You risk matting at the root which can make it more difficult to tighten your extensions. We increase the appointment duration time each week to account for the additional time it takes to do your service. Prolonging too many weeks might shorten the expected amount of time you can wear your extensions continually and may mean more frequent reinstallations.

Frequently Asked questions

FAQ

How do you establish my Tune Up cost and know what week I'm on?

We keep a record in our booking system. We count the weeks from the date of your last Tune Up. See the Tune Up Calendar chart above to better understand your due date and your 3 day grace period.

What if I need to reschedule my Tune Up?

If rescheduling is going to put you outside of the promotional window, we recommend you rescheduling your Tune Up for an earlier date instead. Otherwise, you will miss the promotional cost cut and be charged the regular rate depending on which week you are on. If your stylist needs to reschedule you for a reason on our behalf, we will honor the promotional rate.

What if my 4 Week Tune Up due date is on a Saturday?

This means that your 3 day grace period would end on a Monday, but we are closed on Mondays. So we would recommend that if your exact due date doesn't work for your schedule, to book an earlier date rather than a later date if you want to take advantage of the reduced cost.

What to expect after a new *Skinny Weft Installation*

If it is your first time having extensions installed, there may be a little bit of an adjustment period!

This guide will help you to understand the natural process of acclimating to wearing Skinny Weft extensions!

01

If you have had other extensions before...

You may be used to feeling pain and tension at your scalp with a very tight initial install. With Skinny Weft, your new installation should be comfortable and painless. We intentionally place them a safe distance away from the scalp to allow for your scalp to adjust comfortably to having something new attached to it.

02

Each time your extensions are rotated...

Your scalp will adjust to the new placement. Since the scalp is skin it will “elasticize”. By placing your extensions a safe distance away from the scalp it will minimize the scalp from reacting negatively. It is normal to experience some itching while your scalp gets used to the extensions being attached and can typically last only a couple of weeks.

After your _____ *New installation*

You may experience a little tenderness the first night or two when sleeping.

You may notice additional weight when washing your hair the first few washes.

We recommend waiting about a week or until it feels comfortable to put hair up into a high pony or bun. Mid or low should be okay!

When wearing your hair back, be mindful to release the front corners and free them from any pulling and prevent causing stress to the front corners of your hair.

If you need any adjustments to your extensions, please let us know prior to your future appointments so we can make sure we have sufficient time in the schedule to address your needs!
